GENERAL DENTISTRY

“MODERN AND CONVENIENT DENTAL CARE IN THE COMFORT OF YOUR RESIDENCE”

Our services are mainly designed for elderly, disabled and home bound patients who may benefit from regular and personalized dental care in the privacy of their residence. However, we also see patients who are interested in seeking care in the comfort of their home. Through our services, we can help you solve some of the complex logistical issues related to transportation of elderly and/or disabled patients to a dental office. We come to you!

It may come as a surprise that it may be more expensive and time consuming to bring an elderly or disabled patient to the office than pay for a house-call dental visit. Also, another factor that a lot of people don't take into consideration is “patient anxiety”. Many of these patients are very uncomfortable traveling or become highly agitated when removed from the comfort of their home. However, most of them will cooperate with a highly trained dental team and they will have a minimal disruption of their home daily routine. You can't really put a price on that!

Our primary goal is to develop a long-lasting comfortable relationship and to help you improve and maintain your smile and dental health through different stages of life. Many people don't recognize how important oral health is in the overall health of an individual. Chronic inflammation caused by decay and gum disease can contribute to an increased risk of cardiovascular disease, diabetes, stroke and respiratory disease. Also, homebound patients who take multiple medications and have not received dental care in years may develop drug-induced xerostomia (dry mouth), pain and even malnutrition.

Dr Catrinel Jordan has been providing dental care to residents of nursing homes and Assisted Living facilities in South Louisiana for several years. Dr Jordan's passion has always been to work with the elderly and provide dental care to those who, for different reasons, are not able to go to a regular dental office. Dr Jordan and her highly trained staff provide at-home dental services to patients in the Baton Rouge, Prairieville and surrounding areas, who value high quality care in the privacy and comfort of their residence. Dr Jordan also owns a general dentistry practice in Prairieville, where she is able to offer additional procedures that may not be comfortably done in a mobile setting.

If you want to find out more about our mobile dentistry services or would like to make an appointment for you or your loved one, call us at **225-673-1557** or e-mail
